

Summary

Aspiring Web Developer with an Associate Degree in Computer Science, proficient in HTML, CSS, and jQuery. Passionate about creating user-friendly web applications and eager to contribute to dynamic development teams. Motivated beginner committed to continuous learning and growth in the tech industry.

Project

J-PETS Website

- Developed a website called J-PETS using AngularJS, Bootstrap, HTML, and CSS.
- The website serves as a platform for a pet service provider, offering information about their services, company details, and contact information.
- Utilized AngularJS routing for seamless navigation between different sections of the website.

Online Banking Management System

- Developed a comprehensive website using Java, JSP, and Servlets, providing robust online banking services.
- Implemented secure and efficient database management to handle user accounts, transactions, and financial records.
- Designed an intuitive user interface for seamless navigation and enhanced user experience.

Hotel Management System

- Utilized C++ classes to create detailed and modular representations of employees, guests, and rooms, ensuring a scalable and maintainable codebase.
- Developed and implemented functionalities for guest check-in/check-out, billing, and guest summary reports, enhancing overall operational efficiency.
- Designed a menu-driven interface that allows easy navigation and operation by hotel staff, improving user experience and operational workflow.
